**What were the successful aspects of your group and group dynamics?**

We were very good about scheduling meetings, especially considering how hard it is to find a time where all 5 people were available. We rehearsed several times before the final presentation.

---

**If you were to repeat the project, would you and/or your group do anything differently?**

---

I wish I might've gotten one of the other labs which had more to do with music synthesis, which seems very cool. We would have likely made a more elaborate poster/include multiple slides for the presentation.

---

**Do you have any additional comments about your group and/or the success of the project?**
